designing touchless gestural interfaces for public displays ph.d. thesis vito gentile . abstract i abstract in the last decade, many authors have investigated and studied touchless and gestural interactions as a novel tool for interacting with computers. moreover, **designing user interfaces for multi- touch and surface ...** - designing user interfaces for multi-touch and surface-gesture device abstract the design and research communities have access to multi-touch and gestural interfaces which have been released on a mass market scale. this allows them to design and develop new, unique, and richer design patterns and approaches. these methods are no longer **enduring interaction: an approach to analysis and design ...** - design of animated gestural interfaces in creative computing systems kenny k. n. chow school of design ... with increased popular deployment of gestural interfaces in systems such as the nintendo wii, microsoft kinect for ... asserting that in designing interfaces affordances should be made perceivable and noticeable to users [4] (pp. 22-23). **kib: simplifying gestural instrument creation using widgets** - gestural interfaces that use the microsoft kinect, we hope to make gestural instrument design simpler and more accessible. 2. background many systems for designing user interfaces make use of widgets, especially for multitouch interactions. however, very few systems extend this generic widget-based design to in-air gestural interfaces. **human-computer interaction design studio "gestural interface"?** - designing gestural uis a designer must consider: (a) the physical sensor (b) the feedback presented to the user (c) ergonomics and industrial design (d) the interplay between all interaction techniques and among all devices in the surrounding context (e) the learning curve gesture design exercise **cultural similarities and differences in user-defined ...** - cultural similarities and differences in the use of gestures on small, handheld, touchscreen user interfaces. a total of 340 participants in the study were asked to define their own gestures for 28 common actions like "zoom" and "copy" on a custom-constructed gesture recorder that simulated a handheld touchscreen device. **designing the user interface for multimodal speech and pen ...** - designing the user interface for ... multimodal interfaces are expected to support a wider range ... in this paper, we summarize the emerging architectural approaches for interpreting speech and pen-based gestural input in a robust manner— including early and late fusion approaches, and the new hybrid **adapting user interfaces for gestural interaction with the ...** - appropriate for designing gestural input for real-time user interfaces. it is perhaps more informative to examine human movement representations from other domains. laban movement analysis (lba) is a formal and universal language for describing human movement, including both its low-level muscular attributes and high-level expressive features [17]. **human-computer interaction design studio "gestural interface"?** - designing direct interactions a designer must consider: (a) the physical sensor (b) the feedback presented to the user any treatment of input devices without regard to corresponding feedback is like trying to use a pencil without paper!
